

To Whom it May Concern: Please do not take our rights away on the Satellite Radio Network, It has a variety of listening available to all. I would appreciate this request to save the traffic and weather channels, as not all station can be brought in when you are in the area of disaster of a tornado developing while traveling.

The quality of the satellite radio is profound in the nature of listening and can not be found elsewhere. As you are traveling you would loose the signal of a regular stations. I would much rather prefer the satellite radio. We pay for this service and would like for it to remain open for all. Thank You Wanda Leonard
